

Workplace Connections Work Health Safety

Refresh, update and where to next?

New safety laws have been in place in SA for almost 4 years. It's a good time to take stock of how the laws are being applied (in SA and across Australia) and to consider the direction taken by regulatory bodies and by businesses in response.

Please join Guy Biddle and Will Snow to explore this area and consider their recommendations for safety in 2017 and beyond. Contractor management will be a focus of the session.

We encourage you to join us post presentation to catch up over a drink and a quick bite.
